

Christine Jones

Senior Product Manager · Regulated B2B SaaS & Life Sciences

cmjones319@gmail.com · linkedin.com/in/cmjones319 · christinemjones.com · United Kingdom

PROFESSIONAL SUMMARY

Strategic Product leader with 7+ years in enterprise SaaS, specialising in scaling regulated B2B platforms in Life Sciences. Adept at bridging clinical, technical, and business needs to drive cohesive user experiences across two-sided platforms — serving both enterprise customers and end users. Proven track record of building and mentoring high-quality teams, shaping multi-product roadmaps, and driving cross-functional alignment to deliver measurable product growth and efficiency. Passionate about leveraging AI and data-driven insights to simplify complexity and accelerate impact.

CORE COMPETENCIES

Multi-product Platform Strategy · Cross-functional Leadership · Systems Thinking · Stakeholder Communication · PM Mentorship & Team Development · eClinical Software (EDC, eCOA, CTMS, Reporting) · Regulatory & Compliance Awareness · Empowering Autonomy · OKR Definition & Delivery · Product Lifecycle Management · Prioritisation Frameworks · Experiment Design & A/B Testing · Feature Discoverability & User Engagement · Go-to-Market Execution · AI/ML · Market & Competitive Analysis · Change Management · Web & Mobile Platforms · Effective Feedback Loops

PROFESSIONAL EXPERIENCE

Product Domain Expert (SME) | Lindus Health

Remote · United Kingdom · 2025 – 2026

- ▶ Translated complex clinical requirements into user-first product solutions, championing cross-functional collaboration between Clinical, Medical, and Product teams to deliver cohesive and effective user experiences.
- ▶ Leveraged industry expertise and competitive analysis to identify AI and automation opportunities in EDC, prioritising features aligned with long-term platform scalability.

Senior Product Manager | Medrio

Remote · United Kingdom · 2023 – 2025

- ▶ Owned and executed the multi-product roadmap, aligning Engineering, Architecture, and Design around strategic goals to ensure timely, high-quality delivery of platform capabilities.
- ▶ Led go-to-market strategy for EDC and reporting/analysis products, collaborating with Marketing and Sales to drive successful product launches and measurable customer adoption.
- ▶ Mentored 3 Product Managers and Owners across global timezones through hands-on collaboration and feedback, improving team performance and cross-functional alignment.
- ▶ Served as primary stakeholder liaison, translating customer pain points into actionable product requirements — communicating clearly to audiences from engineering teams to executive leadership, and informed by churn and win/loss data to ensure decisions reflected real retention risk.
- ▶ Led vendor evaluation to replace a legacy reporting platform, selecting a scalable, AI-enabled solution requiring deep evaluation of technical tradeoffs in partnership with engineering leadership.
- ▶ Developed high-performing Scrum teams, empowering engineers and testers to contribute strategically to product decisions, resulting in higher-quality delivery and faster iteration.

Senior Product Owner | Medrio

Remote · United Kingdom · 2019 – 2023

- ▶ Owned end-to-end product lifecycle for multiple data entry products on a two-sided platform — serving both enterprise customers (CROs and trial sponsors) who configured and managed studies, and clinical end users (investigators, site staff, and trial participants) completing data entry and remote surveys, each with distinct needs and levels of technical sophistication.
- ▶ Shipped product-led growth initiatives that expanded addressable market: delivered oncology-specific EDC features that opened new customer segments and an offline-capable native mobile app (iOS and Android) enabling data collection in low-connectivity clinical environments.

- ▶ Designed and ran A/B tests and usability studies in collaboration with UX to validate feature hypotheses and determine best implementations, using adoption and engagement metrics to measure impact.
- ▶ Improved feature discoverability and reduced user friction through iterative quality-of-life updates, proactively identifying where users experienced confusion or drop-off and weaving UX improvements into related feature developments.
- ▶ Fostered user engagement through a community platform where users submitted feature requests, accessed documentation, and connected directly with the product team — creating a strong feedback loop that informed roadmap decisions.
- ▶ Authored PRDs, user stories, and acceptance criteria that reduced ambiguity and improved delivery efficiency across engineering and QA teams.
- ▶ Led cross-functional teams (Engineering, QA, Design) in a collaborative, co-creation culture, onboarding new members and fostering shared ownership of product decisions.
- ▶ Contributed to release training sessions and GTM readiness, enabling cross-functional teams to confidently support product launches.

Senior Project Manager | Medrio

Remote · United States · 2016 – 2019

- ▶ Oversaw technical projects for the company's largest enterprise customers, consulting through implementation and use of the products to ensure successful adoption and reduce time-to-value.
- ▶ Designed and delivered train-the-trainer programmes and eLearning materials for Project Managers and customers, strengthening internal knowledge-sharing and enabling self-sufficient product adoption.
- ▶ Led departmental process improvement initiatives, including infrastructure initiatives to enhance operational efficiency.

TOOLS & PLATFORMS

Project Management & Delivery: Jira, Confluence, Linear, Trello, Asana, Notion

Product & Design: Figma, Miro, Pendo

AI & Automation: Claude, ChatGPT, Notion AI, GitHub Copilot, Cursor

Collaboration & Engineering: Slack, GitHub, Salesforce

CERTIFICATIONS & TRAINING

- ▶ AI Fluency: Framework & Foundations — Anthropic
- ▶ Pragmatic Certified Product Manager — Pragmatic Institute
- ▶ 5 Day Coding Challenge — Code Institute
- ▶ Leadership Development Program — Medrio

EDUCATION

BSc Business Management · Concentration: Information Systems

CSU Monterey Bay, CA, US · 2008
